LIFESTYLE OF THE ENVIRONMENTALLY CONSCIOUS

MEET OUR NEW GENERAL MANAGER

Meet Mike Leggins, the new General Manager for Recology Yuba-Sutter! Mike, who earned a B.S. in Civil Engineering at CSU, Sacramento, is a California Registered Professional Engineer and has been with Recology for more than 20 years.

Mike is originally from Seattle, Washington, but most recently served as the General Manager for Recology Humboldt County. Prior to being the GM at Recology Humboldt County, Mike worked as a Project Manager in the Corporate Landfill Division.

“Recology Yuba Sutter has an outstanding reputation within our company as a well-run site and a great community partner,” said Leggins. “It is an exciting opportunity for me to work with such a dedicated group of individuals. I jumped at the chance!”

Mike is currently making the transition between Humboldt County and Yuba-Sutter, and will permanently be in the Yuba-Sutter area by April 1st. Mike will continue to support the Yuba-Sutter Chamber and its members, alongside the Recology Yuba-Sutter team.

Mike enjoys spending time with his wife, Joanna, and their 4 children, hiking, biking, and scuba diving. His is also the President of a WW2 reunion group for the USS Yorktown CV-5 and plans reunions every year for survivors of that ship (of which his father is one of).

REUSE IT!

In honor of Earth Month, give your trash a second life:

Coffee Grounds → **Plant Food**
Mix them into soil for a nitrogen-rich boost

Cardboard Tube → **Knife Protector**
Slide on blade, flatten and tape to stay safe on picnics.

Newspaper Bag → **Shoe Sleeve**
Packing? Slip a sack over each shoe. Bon voyage!

RECOLOGY'S NEW PINTEREST PAGE

Check out our new Pinterest page at www.pinterest.com and search for Recology Yuba Sutter. We're getting our page started by pinning recycling tips and ways to repurpose items instead of sending them into our landfills.

To make this easy bird feeder, cover a used toilet paper roll with peanut butter and then roll it in bird seed. Hang outside on a tree to give a tasty treat to our feathered friends!

PLASTIC BAG LEGISLATION

The first phase of the law banning single-use plastic bags was scheduled to begin on July 1st, 2015, however, opposing parties have collected enough signatures to send the issue to a vote in the General Election in November, 2016. Regardless of what happens with the state law, Recology encourages everyone to use recycled, multiple-use bags for all your shopping needs. Single-use plastic bags are impacting our landfills at an alarming rate and need to be discontinued. If you must use single-use plastic bags from time to time, take them back to any grocery store for recycling.

SPRING CLEANING?
