COTATI | SPRING 2018 EDITION

HELLO COTATI!

We are genuinely excited to join the Cotati community as your new recycling, compost, and garbage collection service provider! The Recology mission represents a fundamental shift from traditional waste management to resource recovery. Our vision at Recology is to create a world without waste by finding the best & highest use for all materials we collect.

We've been recycling long before there was even an industry for it. Our founders immigrated to San Francisco in the mid 1800's looking for opportunity and they eventually found work doing what no one else wanted to do - picking up other people's garbage.

They called themselves scavengers - in fact, the Recology Sunset Scavenger company name is a nod to these same founders. The original scavengers sorted through refuse materials to find what was salvageable. They would then wash, package, and sell materials of value. Little did they know that they were creating a foundation for our current business model today.

We have over 100 years of experience and 45 operating companies that provide service to over four million customers from California to Washington. We are excited to bring our vision, history, and knowledge to Cotati.

Get ready for new energy, an experienced vision for waste reduction, and improved service. We also have many educational materials and tools to help our commercial and multi-family dwelling customers recycle and compost more.

In this guide you'll learn more about our commitment to the community, customer service, and the environment.

LEGISLATION INFO

We work closely with the city and state government to ensure that our shared sustainability goals are achieved.

We help our commercial customers to be in compliance with state laws AB 341 and AB 1826.

AB 341 Commercial Recycling

California Assembly Bill 341 (AB 341) mandates recycling for all businesses and schools that generate more than 4 cubic yards of solid waste per week, and multifamily dwellings of 5 units or more. AB 341 is designed to reduce greenhouse gas emissions in the state by 5 million metric tons of carbon dioxide (CO₂).

Businesses and property owners are able to subscribe to recycling services to comply. Property owners of a business or multifamily dwelling may also require tenants to source separate their recyclable materials to aid in compliance.

AB 1826 Commercial Organics

California Assembly Bill 1826 (AB 1826) became effective April of 2016, and mandates commercial establishments that generate a minimum of 4 cubic yards of organics per week must arrange for an organics recycling program. Organics include both food scraps and yard trimmings.

The goal of this legislation is to prevent organic materials from ending up in the landfill, when they have a higher use.

WASTE ZERO SERVICES

Let our Waste Zero Team help your business, multi-family dwelling, or school divert as many materials as possible away from the landfill.

Recycle more, save more!

Our talented team of Waste Zero Specialists provides free technical assistance, including on-site waste analysis, staff trainings, and presentations. They will also provide you with a free starter kit of internal containers and signage.

- ✓ Posters, labels, magnets, & window clings for free (*custom if needed*)
- ✓ Technical assistance from Waste Zero Specialists
- ✓ Employee trainings & school presentations
- ✓ Educational tables at events

WE PUT THE 'G' IN 'GROW'

When we are recruiting for new Recologists, we invite people to "Grow With Us". In this case, the word "GROW" is actually an acronym. The "G" stands for Giving back to our communities and our environment by volunteering time and resources. We aren't just another utility

service. We are excited to be part of this community!

In the wake of the devastating North Bay Wildfires, employees from Recology locations all over the Bay Area wanted to do something to help. In December, 222 of us descended on Howarth

Park in Santa Rosa to restore and re-beautify the popular park. We planted 40 trees and 50 plants. We spread 160 cubic yards of Recology mulch and removed 20 cubic yards of weeds, leaves, and tree branches. It was an honor to get our hands dirty and help the community we would soon be servicing.

Now that we're in operation, we can't wait to do more. We will be donating our time and resources to local non-profits as well as community events all over Sonoma County. If there is an event you think we should be a part of, be sure to let us know.

Want to know what the "R-O-W" stand for? Check out Recology.com where you can find that and much more. We look forward to being a big part of what makes Sonoma County so special.
