## WHAT IS ZERO WASTE?

### THE PROBLEM

Landfills are a significant source of the potent greenhouse gas methane, created when organic materials like food waste decompose without oxygen. Organics, recyclables, and many other materials are resource-intensive to manufacture and limited in supply. They should instead be reused and recycled to sustain economies and healthy communities for the long term.

### DEFINITION OF ZERO WASTE

Zero waste is a philosophy that promotes reuse, recycling, composting and conservation programs, and emphasizes sustainability by considering the entire life-cycle of products and systems.   
Source: Zero Waste North Bay [zerowastenorthbay.org](http://zerowastenorthbay.org)

### WHAT DOES ZERO WASTE LOOK LIKE?

Zero Waste does not require perfection. Make small changes to lifestyle habits and consumer choices, and work towards bigger goals. Zero Waste Sonoma's vision is an engaged and informed community with the shared goal of thriving in a sustainable region without waste. Zero Waste supports:

- Reducing waste
- Promoting the best and highest use of material
- More sustainable consumption
- Resource conservation and preservation

### ZERO WASTE WEEK

Zero Waste North Bay is organizing a County-wide "Zero Waste Week" (ZWW) from July 23-29, 2023. ZWW is a grass-roots approach to raise awareness about the environmental impacts of waste and encourage a zero waste lifestyle. Throughout the week, North Bay organizations, businesses, and community groups will offer ways for the public to tap in to zero waste through activities that focus on reducing, reusing, recycling, repurposing and composting. Anyone can be part of the solution! Join us for a week of events highlighting zero waste action.

Visit [zerowastenorthbay.org](http://zerowastenorthbay.org) for more information.

### LOCAL COMMITMENT

Jurisdictions in Sonoma County have implemented, or are considering, a Zero Waste Resolution with the goal of diverting 90% of all material from landfills by 2030. Furthermore, many jurisdictions have implemented Climate Emergency Resolutions with waste reduction related components.

Visit [zerowastesonoma.gov/zw-resolution](http://zerowastesonoma.gov/zw-resolution) for more information.

## REVISITING RECYCLING

**IS IT RECYCLABLE?**  
SEE PAGE 7

It is time to go back to the basics of the "Three R's." Recycling is a big part of achieving zero waste, but people are growing more concerned that the items they recycle curbside are not actually recycled. Don't worry; they are, but mold, moisture, and non-recyclable items cause contamination of the load, increasing the likelihood that some recyclables get landfilled. When in doubt, check our website to see if an item can be recycled. Remember to place clean paper and dry, flattened cardboard boxes in the recycling cart. Make sure your curbside cart lid closes completely to ensure materials don't get wet or dirty. Pour out liquids from plastic bottles, aluminum cans, and glass bottles before placing in your recycle bin. Leftover food from plastic containers and greasy napkins should be composted in the green bin. Always place recyclables loose in your cart; do not bag recyclables. Plastic bags prevent materials from being sorted and can get stuck in recycling machinery. Practicing these good habits helps ensure recovery and reuse of recyclable materials.

## RETHINK "BUSINESS AS USUAL"

**POLICY AND BUSINESS ASSISTANCE PROGRAMS**  
SEE PAGES 14 & 15

Local zero waste ordinances, like bans on single-use plastic bags and polystyrene food ware, affect many different businesses across different industries. Zero Waste Sonoma has grant funds available to help food service entities make the switch to reusable foodware. The Sonoma Green Business Program honors businesses that meet high environmental standards. Want to give a shout-out to a local business going above and beyond for the environment? Contact us at [zerowastesonoma@sonoma-county.org](mailto:zerowastesonoma@sonoma-county.org).

## REFILL - MAKE THE SWITCH FROM SINGLE-USE

**REFILL SHOPS**

Making the switch from single-use, disposable products can seem daunting. Luckily, there are several refill/reuse stores locally, which offer zero waste lifestyle brands and bulk refills to help eliminate plastic packaging. Customers can bring their empty containers and purchase products such as hand soap, dish soap, laundry detergent, shampoo, conditioner, and other beauty products based on weight. Scan the QR code for a list of refill stores near you.

**REFILLABLE PROPANE CYLINDERS**  
SEE ZERO WASTE LIFESTYLE PAGE 10

## RENEW - GIVE NEW LIFE TO OLD STUFF

**LEARN MORE ABOUT REUSE, REPAIR, AND REPURPOSING**

The best way to prevent waste is not to create it in the first place. Give your old stuff a new life by getting small appliances, lamps, and electronics repaired instead of buying replacements. Renew your wardrobe with a clothing swap. Attend a local fix-it clinic or repair workshop. To learn more about reuse and repair, scan the QR Code.

**RECONNECT**

To achieve Sonoma County's zero waste goals, we all need to pitch in. Volunteer for a local cleanup event, contribute your expertise to a repair clinic, or simply subscribe to the monthly Zero Waste Sonoma e-Newsletter to stay connected.

Contact [zerowastesonoma@sonoma-county.org](mailto:zerowastesonoma@sonoma-county.org) for details.

**REVIVE - SOIL AMENDMENT**

Reduce landfill methane production by placing food scraps in your curbside green bin, where they will be sent for composting. Apply compost on landscaping and home gardens to boost soil health.

## PREVENT FOOD LOSS AND SAVE MONEY

**CHECK YOUR SUPPLIES BEFORE SHOPPING** to use up the food you have.

**STICK TO A GROCERY LIST** to avoid impulsive buying. Don't shop when you're hungry.

**PROACTIVELY FREEZE** bread, vegetables, dairy, and meat before they go bad if you don't go through the food fast enough.

**DRY OR FERMENT** extra food. Learn more through the Master Food Preservers: <https://ucanr.edu/sites/MFPSC/>

**BUY A VARIETY OF FOOD** to have nutritious meals available through the week. Some foods last longer than others. Vegetables like leafy greens and mushrooms spoil more quickly than root vegetables and squashes so plan accordingly.

**PURCHASE FOOD THAT IS IN SEASON** for the greatest value, the least embedded food miles, and longevity of shelf life. Further, consider purchasing from local farmers and markets first when planning your shopping; that ensures seasonality, freshness, minimal packaging, and maximum impact on the local economy.

## CREATE AND USE COMPOST

Food loss prevention and donation are best, but when food spoilage occurs, please compost! Turn organic materials like plant trimmings and food scraps into a nutrient-rich soil amendment. Compost helps plants grow and improves water retention in soil. To find a compost giveaway near you, visit: [zerowastesonoma.gov/compost-giveaways](http://zerowastesonoma.gov/compost-giveaways).

### AT THE CURB

All food scraps are accepted in green curbside bins serviced by Recology Sonoma Marin, Sonoma Garbage Collectors, and Sonoma County Resource Recovery.

SEE CURBSIDE SERVICES PAGE 6

## THE PROBLEM WITH BIODEGRADABLE AND COMPOSTABLE PLASTIC PRODUCTS

Plates, bowls, cups, utensils, bags, or other food service ware labeled **biodegradable** or **compostable** cannot be composted in the backyard or placed in curbside green carts. Backyard compost piles don't reach high enough temperatures to break them down. Industrial composting facilities cannot easily distinguish these products from conventional plastic products, so they are screened out and sent to the landfill. Please choose reusable items whenever possible and place compostable plastic products in the garbage cart.

## DONATE FOOD TO PEOPLE

Donate perishable and non-perishable food to feed people. Only food that is fresh (not expired), whole, and/or with intact and unopened packaging accepted.

OF PRODUCTS

The recycling industry is controlled by economics of supply and demand. When you buy goods made with recycled content, your purchases help create a demand for materials collected in recycling programs.

Remember to ask stores you frequent which products they carry are made with post-consumer content. This means the product was made from materials that were used and recycled by consumers, rather than from virgin material.

## REUSE-TO-GO

There are many things you can do to reduce your trash footprint. Make a pledge to continue doing the things you already do, and choose new actions you are willing to commit to. For example:

### CARRY A REUSABLE BOTTLE AND CUP/MUG

### DINE IN

### SAY NO TO STRAWS OR BRING YOUR OWN REUSABLE STRAW

### SHOP FOR SECONDHAND GOODS

### AVOID HEAVILY PACKAGED FOODS AND PRODUCTS

### BRING YOUR OWN SHOPPING AND PRODUCE BAGS

### BUY FROM BULK BINS WITH REUSABLE CONTAINERS

### BUY BULK ITEMS SUCH AS DISH SOAP, SHAMPOO, LOTION, AND LAUNDRY DETERGENT FROM A LOCAL REFILL SHOP

For list of local refill shops, visit:

# USED MOTOR OIL AND FILTER RECYCLING

## ARE YOU A DO-IT-YOURSELFER? RECYCLE YOUR MOTOR OIL AND FILTER TOO!

### HOW TO USE OIL COLLECTION SITES

**DID YOU KNOW THAT USED MOTOR OIL NEVER WEARS OUT? IT JUST GETS DIRTY AND CAN BE RECYCLED, CLEANED, AND USED AGAIN.** Place your motor oil in a drain pan or sealed see-through reusable container you take back with you. Some sites offer a 40¢ per gallon rebate for used motor oil.

**VISIT SITES DURING BUSINESS HOURS. ABANDONING OIL OR ANY OTHER SUBSTANCE IN ANY QUANTITY AFTER HOURS IS NOT RECYCLING! IT IS ILLEGAL, PUNISHABLE BY IMPRISONMENT OR A FINE UP TO \$10,000.**

- Sites typically accept no more than 5 gallons of used motor oil and 2 filters at one time.
- 1 or 2 oil filters are usually accepted for free; some locations charge up to \$3.
- Antifreeze fees range from no cost to \$3/gallon.

#### ABOUT CONTAMINATED OIL

Sites will not accept used motor oil that has been contaminated with other fluids such as antifreeze, solvents, gasoline, or water. Even a small amount of contamination causes the entire tank of motor oil collected to become non-recyclable. For proper disposal of contaminated motor oil, [SEE HOUSEHOLD HAZARDOUS WASTE PAGE 4](#)

## SHARPS/NEEDLES

### SB 212 PHARMACEUTICAL AND SHARPS STEWARDSHIP BILL

IN 2018, CALIFORNIA PASSED THE PHARMACEUTICAL AND SHARPS STEWARDSHIP BILL REQUIRING PRODUCERS OF PHARMACEUTICALS AND SHARPS TO MANAGE AND OPERATE A COLLECTION AND DISPOSAL PROGRAM. THE STEWARDSHIP PROGRAMS HAVE STARTED TO ROLL OUT ACROSS THE STATE. HERE'S HOW TO PROPERLY DISPOSE OF SHARPS UNDER THE NEW LAW:

#### MAIL-BACK

Mail-back options are dependent on your retailer (pharmacy, online provider, veterinarian, etc.) that provided you with sharps. All disposal options are free. **Option 1:** the retailer has a supply of mail-back sharps waste containers and will provide it to you with the purchase of sharps. **Option 2:** the retailer will ask a stewardship program to send a mail-back sharps waste container to your home address. As this is a new program, it is best to ask your sharps retailer how to receive a mail-back waste container at the point of purchase of sharps.

If your sharps retailer doesn't participate with a stewardship program yet, you may contact them directly. Some stewardship programs are brand-specific and may not accept all brands of sharps.

### WHAT'S THE PROBLEM

#### DANGER TO WORKERS

California State Law makes it illegal to dispose of home-generated sharps in the garbage or recycling bin.

This includes hypodermic needles, pen needles, intravenous needles, lancets, and other devices that are used to penetrate the skin for delivery of medications used in the care of people and animals.

When placed in the garbage or recycling bin, sharps can injure sanitation workers.

#### DROP-OFF AT HHW PROGRAMS

HHW facilities are allowed to accept sharps under SB 212. To drop-off, follow these instructions:

- For drop-off, sharps must be in FDA-approved sharps containers.
- The only legal way to transport used sharps is in an FDA-approved sharps container.
- The container must be labeled **Sharps Waste** and **Biohazard**.
- Sharps waste will not be accepted in paper bags, plastic bags, or non-approved containers.
- Household Hazardous Waste programs will not accept sharps that contain controlled substances.
